November 1999

21st Century Schools Program

School Year 1998-1999

State of Tennessee
DEPARTMENT OF EDUCATION

Don Sundquist, Governor
E. Vernon Coffey, Commissioner

Creating a
World-Class
System

21st Century Schools Program
1999 Report Card

“Our commitment to improving education continues. It is now time to adapt education to the way Tennesseans live and work in the 21st century. We want to provide the best education possible for our children in the new millennium.”

- Governor Don Sundquist

Table of Contents

21st Century School Systems Report Card

i. Introduction

I. Tennessee Student Data

A. Tennessee Student Demographics

- 3** Number of Students in Public School Systems
- 7** Ethnic Composition of Tennessee Public School Systems
- 11** Title 1 Compensatory Education Program
- 17** Free and Reduced-price Meal Programs
- 21** Special Education Programs
- 25** English Language Learner Programs
- 29** Adult High School Students

B. Tennessee Student Performance

- 35** Attendance Rates for Students in Public Schools
- 39** Promotion Rates for Kindergarten through Eighth Grade
- 43** Dropout Rates for Students in Public Schools, Grades Nine through Twelve
- 53** Students Expelled or Suspended
- 63** Tennessee Comprehensive Assessment Program Grades Three through Eight
- 75** Tennessee Writing Assessment
- 79** Tennessee Value-Added Assessment System
- 85** Tennessee Competency Test
- 89** High School Subject Matter Tests—Math
- 95** Scholastic Aptitude Test -SAT I
- 99** American College Test—ACT
- 105** American College Test (ACT)—Work Keys
- 108** Progress in Reading and Mathematics Grade 2

II. Tennessee School Systems Data

A. Tennessee School Systems Demographics

- 113** Total Schools and Grades Served
- 117** Schools Accredited by the Southern Association of Colleges and Schools
- 121** Class-Size Requirements
- 127** Personnel by Category
- 133** Employment Standards Waivers and Permits

B. Finance

- 139** Expenditures by Public School Systems
- 153** Expenditures by Function
- 173** Expenditures per Student
- 177** Expenditures for Principal and Interest on Bonded Debt Paid by Other Agencies
- 181** Average Salaries for Teachers
- 185** Public School Funding by Source
- 193** State and Local Revenue per Student
- 197** Basic Education Program (BEP) Formula
- 211** County-Area Education Fiscal Capacity

*Creating a
World-Class
System*

21st Century Schools Program

1999 Report Card

Report Card Provides Detailed Snapshot of Tennessee Public Schools, Highlights Challenges

How much are the students in Tennessee schools learning? Will they be able to compete with their counterparts from other states? Will they be able to get and keep good jobs in an international economy? What are we doing to help our schools improve? Are our schools safe for our children? These are the questions parents, businessmen, and educators across the state are asking. These are the questions the annual Report Card for Tennessee is designed, at least in part, to answer.

Each November, the Tennessee Department of Education distributes detailed annual reports on the quality and performance of public school systems and individual schools. The yearly Report Cards include a standard set of data for every school system compared with statewide averages. The data can be used at the state and local levels to make important decisions about education. The true strength of the Report Cards can best be found in local communities. It is schools that make a difference in how students learn. The information in these reports can be used by parents, educators and other members of the public to make a positive difference in their local schools.

Academic performance information shows Tennessee students are improving in almost all areas, but the *Report Card* provides additional information that creates a more complete picture of the status of education in the state and emphasizes several areas that will be special challenges in the future. Among these challenges will be overcoming the chronic teacher shortages that are requiring increased numbers of teaching permits to be issued, meeting the needs of increased numbers of students with limited proficiency in English, continuing efforts to improve the ability of all students to read, and maintaining levels of funding needed to continue to improve student achievement.

***How much are our students learning?
Will they be able to compete with their
counterparts in other states?***

The significant taxpayer investment in the state's schools is resulting in substantial gains by Tennessee students. Overall, students in Tennessee have been steadily improving in both academic and non-academic areas. More students are attending and staying in school, more students are passing the high school competency test the first time they take it, and more students are becoming proficient writers. Standardized test scores are up in most areas, and performance on high school end of course tests has improved.

Elementary and middle grades – Tennessee reports value added data for grades 4-8 in five subject areas. Three-year averages reported in 1999 demonstrated academic gain greater than the nationally normed gain in 16 of the 25 grade level/subject areas reported. Cumulative gain (across all grade levels) exceeded 100% in math, reading, language, social studies and science.

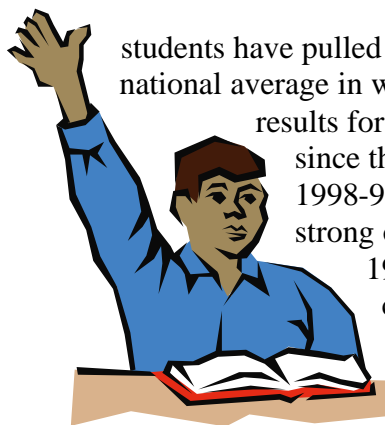

In 1999, students in grades 3-8 showed greater proficiency in reading, language, mathematics, science and social studies than the nation's students in most of those same grades and subjects. On the portion of the state achievement test that allows state comparisons with national norms, Tennessee students scored at or above the 50th percentile on 90% of the scores reported.

High schools - In 1995-96, the first value-added assessment results were produced for high school mathematics subjects. Statewide, school system and individual high school results are reported using data from end-of-course tests administered to students completing pre-Algebra, Algebra I, Algebra II, geometry or Math for Technology. In 1999, statewide score averages improved in all of the subjects tested.

On the Tennessee Competency Test, a total of 71% of Tennessee's ninth graders met the competency requirement in mathematics, 78% met the requirement in language and 65% passed both parts of the exam which must be passed in order to receive a full diploma upon graduation.

Writing Assessment—The National Assessment of Educational Progress (NAEP) has confirmed what Tennessee's own writing assessment shows: Tennessee

students have pulled ahead of other southeastern states and are at the national average in writing ability. The TCAP Writing Assessment results for Tennessee students show substantial progress since the first administration of the test in 1994-95. In 1998-99, 59% of fourth graders scored competent, strong or outstanding compared to 17% in 1994-95. In 1998-99, 53% of seventh graders scored competent, strong or outstanding compared to 52% in 1997-98. In 1998-99, 59% of eleventh graders scored competent, strong or outstanding compared to 31% in 1994-95.

Exit exams - The 1998-99 school year marked the fourth time (1995-96 was the initial year) Tennessee's high school seniors were required to take either the ACT, SAT or Work Keys exam as an exit requirement prior to graduation. Students taking one of the exams to satisfy the requirement now have the benefit of the state's enhanced high school curriculum, which first applied to the graduating class of 1998.

Tennessee's 1999 high school graduates increased their ACT average Composite score compared with 1998 results. Scores for Tennessee's ACT tested graduates also increased in English and Reading. The state's 1999 average in Math, 19.1, and Science Reasoning, 19.8, was the same as in 1998.

SAT reports show a 7.5 % increase in the number of Tennessee's high school students taking Advanced Placement (AP) courses and a 11.3% increase in the number scoring in the 3-5 point range required on AP exams to earn college credit. Tennessee's top 10% continued to outperform the top 10% of the nation's students on the SAT by 30 points on the verbal section and 12 points in mathematics.

Students are in the classroom more--Increased attendance rates and a continued reduction in the dropout rate contribute to higher academic achievement on the part of Tennessee students. For the past five years, attendance rates have steadily improved. Tennessee schools are closing in on the attendance goals of 95% for elementary and 93% for high schools. Although the dropout rate goal of 10% has not been reached, the rate has declined each of the past four years from a high of 16.4% in 1995-96 to the 1998-99 rate of 14.8%.

Will our students be able to get and keep good jobs in an international economy?

To raise the academic bar for all high school students and ensure that they are prepared for higher education and the workplace, in 1998 Governor Don Sundquist introduced and the Tennessee General Assembly adopted, a new testing proposal in key high school subjects.

Tennessee's high school restructured to expectations and link the mandated

assessment program for students has been broaden the for student performance curriculum with state-testing. The new plan

requires proficiency in more challenging subject matter and gives students a stake in the outcome when they take state-mandated end-of-course tests. The legislation provides that end-of-course tests are to be in subjects designated by the State Board of Education and approved by the Education Oversight Committee. The specific subjects were selected by the State Board of Education because of their relation to success in college and the workplace.

The 10 subjects to be tested are: Math Foundations (for pre-Algebra and Math for Technology I students), Algebra I (also for Math for Technology II students), geometry, Algebra II, physical science, biology, chemistry, English I, English II and U.S. History.

Upon the completion of each of the 10 related academic courses, high school students will be tested for understanding and mastery of these subjects. Their grades on these 10 tests may be used as part of their course grades. Starting with entering freshmen in 2001-02, students must pass three of these tests -- English II, Algebra I and biology -- before graduation to earn a high school diploma.

By focusing efforts on key grade levels and subjects, higher quality, more comprehensive assessments can be developed and administered. These

assessments will provide reliable diagnostic information for each student that can be used by educators to improve instruction. The new assessment program not only fulfils the commitment of the governor, Tennessee Legislature and State Board of Education to a diploma that means something, but the program is consistent with the State Board's High School Policy, which emphasizes school-wide reform to ensure that all students meet high standards.

Tennessee continues to broaden opportunities for vocational students by updating vocational programs to provide entry to high wage, high skilled professions through strong academic and technical preparation. New federal legislation provides for more flexibility at the local level, heightened attention to challenging academic standards, opportunities for integration with workforce development and new accountability provisions.

What are we doing to help our schools improve?

Tennessee continues to implement a variety of initiatives designed to promote a positive impact on our schools. From the enactment of the 1992 Education Improvement Act (EIA) class size requirements, to expanded testing requirements, to the enactment of safe and drug free schools programs, the focus is on increasing the quality of education in our schools. In addition, Tennessee has taken the lead in providing students access to the rapidly expanding world of technology. Our schools and school systems are held accountable for meeting performance goals in the following academic and non-academic areas:

- 95% attendance rate for grades K-6.
- 93% attendance rate for grades 7-12.
- 97% promotion rate for grades K-8.
- High school dropout rate of 10% or less.

For elementary schools, a three-year average value-added academic gain greater than or equal to 100% of the national norm gain in mathematics, reading, language arts, science and social studies for grades 4-8.

For high schools, a three-year average value-added academic gain that is above or "not detectably different" from the state average gain for each applicable subject offered by the school. In 1997-98, high school gains were based on pre-algebra, Algebra I, Algebra II, geometry and Math for Technology.

With the passage of the EIA, the Tennessee General Assembly placed more emphasis on smaller class sizes to increase students' chances of

academic success. The EIA requires smaller class sizes for all grades by school year 2001-02. Beginning in the 2001-02 school year, Tennessee school systems will no longer be able to obtain waivers for schools that do not meet the smaller class size requirements.

Grade Level	Average Class Size	Maximum Class Size
K-3	20	25
4-6	25	30
7-12	30	35
Vocational Education	20	25

Overall, 98% of all classes to which the EIA class size requirements apply met the class size limits in 1998-99. The number of Tennessee school systems with classes at or below the class size maximums has more than doubled since 1991-92.

Individual School Plans Focus on Local Improvements

The State Board of Education required each individual school to have a School Improvement Plan in place by 1997-98. The plan should detail a clear vision of each school's strategy to connect student performance with instructional programs. The Department of Education has conducted in-service training on the planning process to help school systems learn how to best use testing data to identify students' needs and provide instructional programs that make a positive difference in student performance.

Challenges in Reading

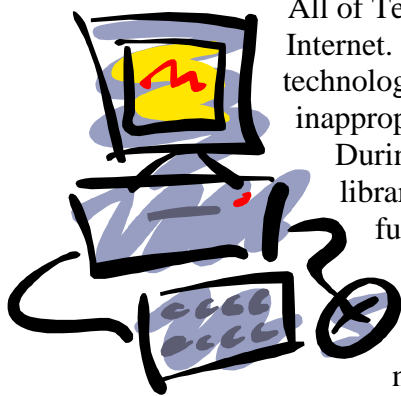

One of the areas in which the department will continue to place increased emphasis is reading. Our goal is to achieve the same kind of improvements in reading that we are seeing in writing. Efforts are already under way to more positively impact the reading skills of our students.

Tennessee third graders are 10 to 15 years away from entering the job market, yet the reading skills they learn today directly affect their ability to earn a living tomorrow. In 1998, the governor launched a statewide reading initiative, *Tennessee Come Read With Me*, as part of a statewide strategy for improving academic achievement and career development. The goal of *Tennessee Come Read With Me* is for every child in Tennessee to enjoy reading and learn to read independently by the end of third grade.

Recognizing that today's careers require greater literacy than ever before, Education Edge enlisted its 51 Community Partnerships to support the statewide initiative. These partnerships, which are made up of parents, educators, businesspeople and community leaders, are publicizing the importance of reading. In addition, they recruit businesses to support elementary school literacy programs by encouraging employees to volunteer to read to kids and by donating money and books to local schools and reading programs.

Technology in the Classroom

The ConnectTEN program, which made Tennessee the first state in the nation to provide Internet access to all of its public schools and libraries, continues to expand with the connection to the World Wide Web of more than 102,000 school and classroom computers.

All of Tennessee's school sites now have safer access to the Internet. Tennessee is the first state to install state-of-the-art technology that protects public school children from inappropriate material on the Internet.

During 1998-99, Tennessee schools, school systems and libraries qualified for more than \$21.9 million in E-rate funding for local improvements in technology. The funding, provided as discounts on telephone bills and other telecommunications services, is used to support the technology and communications needs of schools and libraries across the state.

Statewide, such high-tech tools as classroom computers, interactive multimedia software and video-conferencing are changing how educators work and students learn. Recognizing that professional development is the key to effective use of technology, the state has a major initiative to train 15,000 teachers to use the Web, develop electronic mentors, and incorporate technology into the classroom.

Teacher Shortage

Like most other states, Tennessee continues to have problems attracting and retaining qualified teachers. The increasing number of teaching waivers and permits issued each year is evidence of a prevailing shortage.

Are our schools safe for our children?

The Department of Education's School Safety Center works with local school systems to ensure that Tennessee students attend schools that are safe places to learn. These efforts are reflected in the number of firearms related incidents which have reduced by almost 60% since 1994-95.

School safety grants made possible by the Tennessee General Assembly's appropriation of \$10 million in 1998-99 have made a crucial difference in the school climate by allowing public schools to implement safety programs and purchase safety equipment. These funds were made available to every Tennessee school system for such programs as video surveillance, hiring uniformed officers for at-risk secondary schools, metal detectors, and training educators about security and discipline issues. The legislature provided \$5.6 million to continue these efforts in 1999-2000 and made this appropriation recurring.

Tennessee has made school security a priority since 1994. As a result, all 138 school systems have prepared school safety and emergency management plans. In addition, school safety planning is part of Tennessee's school improvement process.

In consultation with the Commissioner of Safety, the Tennessee Department of Education established advisory guidelines for local school systems to use in developing safe and secure learning environments in schools. The guidelines require every school system to establish an ongoing process for assessing and responding to school safety concerns. In addition, the state guidelines advise all schools to establish policies, procedures and programs that facilitate the early identification of students at risk for violent or disruptive behavior and to consider programs, which provide assistance to these students and their families.

1999 Report Card Overview

The 21st Century Schools Report Cards provide parents, educators, local officials, business and industry leaders and community members with an inside look at how their schools are performing and how state education funds are being spent.

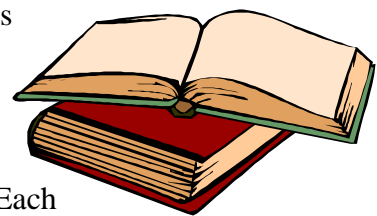

The 1999 report cards represent the eighth set of annual accountability reports the Tennessee Department of Education has published since the Education Improvement Act (EIA) took effect in July 1992. Through its reform efforts and initiatives, Tennessee has rekindled the spirit of the community school and is getting parents and community leaders informed and involved in public education.

What's in the Report Cards?

The 21st Century School Report Cards portray the condition of education in Tennessee's 138 local school systems. The report cards explain to parents and taxpayers the gains students are making on standardized achievement tests, improvements in attendance, promotion and dropout rates, as well as reductions in the number of suspensions and expulsions. Also, the report cards reflect the amount of funding each school system receives from state, local and federal governments and how these funds are expended to improve education in our Tennessee schools.

The data tables used in the school system report cards will be made available on the department's web site at <http://www.state.tn.us/education>. (Go to Stats and Reports, then to 1999 Report Card.) There is a brief narrative before each set of statistical tables to introduce the information presented in that section. Each item illustrates a portion of the education snapshot.

The 1999 Report Card Supplements contain additional types of data, including test scores for individual schools, value-added assessment results showing student gains, student proficiency levels in grades 3, 5 and 8, school system audits conducted by the department's Internal Audit section and school-by-school information on meeting class size standards.

What's new in the Report Cards?

The state requires school systems to conduct and report the results of diagnostic evaluations of student progress in reading and mathematics in earlier grades to assist with program planning and individualizing instruction. For the first time, the report cards include information on the percentage of students performing at or above grade level in second grade reading and mathematics as reported by each school system.

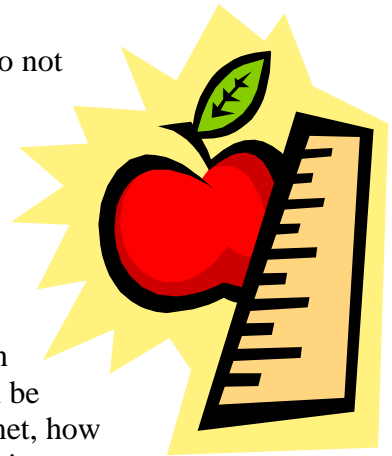

The federal Title I program progress will be included in this year's report card. The percent of schools and students participating will be shown alongside the percent of schools participating in Title I that are meeting academic expectations.

Other Report Card changes include the addition of data on Dropouts and Suspensions and Expulsions by Race and Sex.

How are the Report Cards used?

The numbers, tables and spreadsheets in the report cards do not tell the entire story of the progress, accomplishments and achievements made or of the areas of concern. The individual school system reports provide an opportunity for the public to initiate conversations with local school officials and to learn more about the quality of education taking place in their schools.

At the heart of the data reporting process is an emphasis on school improvement. The information in these reports can be used to evaluate how well school system goals are being met, how much students are learning and how efficiently school districts are being run. These reports enable all Tennesseans to know what their education tax dollars have achieved and will encourage community members to hold their schools accountable for results.

Tennessee Public School Systems
Number of Students

The number of students in public schools in Tennessee has increased annually since 1991-92. The total increase between 1991-92 and 1998-99 was 7.8%. Student counts in 24 systems have increased at more than twice the statewide rate of 7.8%; counts in sixteen of those systems have increased by more than 20%. At the same time, 30 systems have had increases of less than 1%.

The information in the following table is based on the average of daily counts of students enrolled in each school system. These counts are often referred to as average daily membership or ADM. They are a major factor in determining the amount of state funding each school system receives.

Tennessee Public School Systems

Number of Students

System	1991-92	1997-98	1998-99

Tennessee Public School Systems
Ethnic Composition

The ethnic composition of the population of students in Tennessee public schools is fairly stable from year to year statewide. Counts of students by ethnic group show that Tennessee's statewide public school population during the 1998-99 school year in kindergarten through twelfth grade was approximately 74% White, 24% Black and 2% other minorities. The ethnic composition of some systems did change significantly.

Student demographic data, such as ethnic composition, is based on an annual count of fall student membership. Membership is a count of students actually enrolled. Data on ethnic composition is included in this report to describe one aspect of Tennessee's public school student population.

Tennessee Public School Systems
Title I Compensatory Education Programs

The federal Title I program provides funds to school systems to help students who are failing or are at risk of failing to meet state standards. These funds may be used to help individual students or, in high poverty areas, all students within an eligible school. Title I programs establish certain expectations for academic success, and schools that do not meet expectations must amend school improvement plans to implement changes likely to improve student achievement. Schools that do not improve are subject to a variety of sanctions that may be imposed by the school system.

More than two-thirds of the school systems (95 of 137) that have Title I programs have been successful in meeting the program's academic expectations. As shown in the chart below, the percent of students participating in Title I programs has increased substantially, but so has the percent of schools meeting Title I expectations. This improvement comes at a time when the number of schools eligible to participate in school-wide programs has decreased because of changes in the federal program.

	1992-93	1997-98*
Students Participating	15.2%	25.1%
Schools Participating	903	743
Schools Meeting Academic Expectations	63.3%	84.1%

The information in the table on the following pages shows for each school system the number and percent of students served by a Title I program. The table also shows for each system the number of schools with Title I programs and the percent of schools that met Title I expectations for academic success.

* Data for 1998-99 was unavailable at the time of publication.

Tennessee Public School Systems
Free and Reduced-Price Meal Programs

The percentage of students eligible for free or reduced-price meals has remained relatively stable both at the system level and statewide. Approximately 41% of all students in Tennessee public schools are eligible for free or reduced-price meals. This figure is up just slightly over last year. Compared to 1993-94, figures for school systems have remained fairly stable, with around 36 of the 138 school systems having 50% or more of their students eligible for free or reduced-price meals. In most systems, 30% to 50% of the students are eligible for free or reduced-price meals.

Because of the link between poverty and poor performance in school, the state provides additional funding through the Basic Education Program (BEP) formula to lower class sizes in schools with higher percentages of students eligible for free or reduced-price meals. Funding is generated by the formula to reduce class sizes in kindergarten through third grade from the Education Improvement Act (EIA) standard of 20 students for one teacher to a standard of 15 students for one teacher. The federal Title I Compensatory Education Program also uses data on eligibility for free and reduced-price meals to allocate funds.

Tennessee Public School Systems
Special Education Programs

In school year 1998-99, 16% of all public school students in Tennessee received special education services. This year the Report Card is reflecting Special Education Services Average Daily Membership for Primary Options. Tables depict this change beginning in the 1995-96 school year. The percentage of students receiving services in each school system ranged from a low of 11% to a high of 29% in 1998-99. Twenty-nine school systems had 20% or more of their students in special education programs, while fifty-two systems had 15% or fewer of their students in special education programs.

Prior to the 1995-96 school year, the number of special education students reported was based on a one-day head count. Based on that method, 18% of students received special education services in 1991-92. Since 1995-96, special education student counts are based on an average count for the entire year. These figures are a major factor in determining the amount of state funding each school system receives.

Because special education services cost more than regular instruction programs, both the state and the federal government provide additional funding for those services. State funds are provided as part of the overall funding included in the Basic Education Program (BEP) formula for classroom expenses. This formula includes caseload funding ratios for teachers; additional personnel for assessment and teacher assistants; and materials, supplies, instructional equipment and classroom-related travel.

Tennessee Public School Systems
English Language Learner (ELL) Programs

Students whose “Primary Home Language is Other Than English” (PHLOTE)

An English Language Learner (ELL) is one whose native language is not English and whose difficulty in listening, speaking, reading or writing English is an obstacle to successful learning in a classroom where English is the language of instruction. The ELL student must be provided the services of a certificated English as a Second Language (ESL) teacher.

For school year 1998-1999, 103 of the 138 school systems (75%) in Tennessee reported ELL students. This is a substantial increase over the 1993-94 school year when 65 of 139, or 47% of the school systems, reported ELL students. For school year 1998-1999, school systems reported 9,191 ELL students, which is 268% greater than the 3,430 students reported during the 1993-1994 school year. Dramatic increases were reported both in large urban systems and in rural counties.

Tennessee Public School Systems
Adult High School Students

The typical adult high school program in Tennessee public schools offers a chance for students to earn a high school diploma at their own pace in a location and at a time convenient for them. Students may enter at any time of the year, attend classes on a flexible schedule while holding a job or attending to family responsibilities, and graduate when they have met the requirements. Students must be at least 17 years of age and are required to have 133 contact hours per course to earn one unit of credit.

The information in the following table is not a “head count” of students in the adult high school programs, but a full-time equivalent count based on full-time being defined as four hours each day. About one-third of Tennessee school systems offer an adult high school program. The student counts for these programs fluctuate from year to year. There were 1,414 Adult High School students in 1993-94, the first year in which they were reported. By 1998-99, the number of students had decreased 23% to 1,086. This was a 6% increase over the prior year.

Tennessee Public School Systems
Attendance Rates

The attendance rate is the average number of days students attend school compared to the average number of days the students are enrolled. The tables on the following pages include separate attendance rates for Tennessee public school students in kindergarten through sixth grade and for students in grades seven through twelve. Attendance rates are important because they may affect students' achievement.

Attendance rates for Tennessee's public school students tend to be stable from year to year with an overall 95% attendance rate for students in kindergarten through sixth grade and 93% for students in grades seven through twelve as reported in 1998-99. During the 1998-99 school year, 78% of Tennessee's public school systems with students in kindergarten through sixth grade achieved an attendance rate of 95% or higher. For those Tennessee public school systems with students in grades seven through twelve, 78% achieved an attendance rate of 93% or higher during the 1998-99 school year.

Tennessee Public School Systems
Promotion Rates for Kindergarten through Eighth Grade

The overall promotion rate for all Tennessee public school students in kindergarten through the eighth grade in 1998-99 was 96.4%. The statewide figure has increased slightly since 1991-92 when it was 95.8%. Promotion rates by school system for the 1998-99 school year ranged from 89.8% to 99.9%. Eighty-six of Tennessee public school systems achieved a promotion rate of 97% or greater.

The Tennessee promotion rate is the total number of Tennessee students promoted to the next grade at the conclusion of the school year compared to the total number enrolled for that year. A combined promotion rate for each Tennessee school system is reported in the following table for kindergarten through the eighth grade. This rate is an indicator of student academic progress. A low promotion rate often correlates to a potential student dropout problem.

Tennessee Public School Systems
Dropout Rates
Grades Nine through Twelve

The Tennessee statewide dropout *event rate* has varied only slightly over the years, but varies considerably among systems for 1998-99, from a high of 14.4% to less than 1%. Statewide less than 5% of Tennessee high school students have dropped out each of the last four years. Event rates are important because they reveal the proportion of students who leave high school each year without completing a high school program. Tennessee defines the event rate as the number of students in grades nine through twelve who drop out of school during a given year divided by the net enrollment in grades nine through twelve for the same year.

The statewide dropout *cohort rate* for 1998-99 was 14.8% down more than one and a half percentage points from 1995-96 (the first year for which this data was reported). The 1998-99 cohort rate varies considerably among school systems, from a high of 46.8% to a low of 1.1%. During the 1998-99 school year, 40% of all Tennessee public school systems had a cohort dropout rate of 10% or less. The cohort rate is the percentage of an entering ninth grade class that has dropped out by the end of twelfth grade. It is calculated by dividing the number of students in a graduating class, who dropped out over the four years they were in high school, by the class's ninth grade net enrollment.

Tennessee defines a dropout as an individual who (1) was enrolled in school at some time during the previous school year; (2) was not enrolled at the beginning of the current school year; (3) has not graduated from high school or completed a state- or system-approved education program and; (4) does not meet any of the following exclusionary conditions: (i) transfer to another public school, school system, private school, or state- or system-approved education program; (ii) temporary absence due to suspension or illness; or (iii) death. [Definition adopted from the National Center for Education Statistics (NCES).]

This year, for the first time, the Tennessee Department of Education is publishing dropout data by race and sex. Rates are not considered statistically significant if the number of students in the category is 100 or less. These categories are marked "ns".

Tennessee Public School Systems
Students Expelled or Suspended

The total number of students expelled and suspended from Tennessee public schools during the 1998-99 school year increased significantly compared with 1991-92 figures; however, between 1997-98 and 1998-99 the figures are down slightly. The increase in expulsions and suspensions since 1991-92 can be attributed to the implementation of stricter discipline policies that have been enacted to provide a safer and more secure learning environment.

The data reported in the following table includes the total number of students in Tennessee public schools, kindergarten through twelfth grade, who were expelled or suspended from school. Suspensions and expulsions are included in this report as indicators of student conduct and disciplinary problems in schools. These numbers do not include students who were expelled or suspended from Tennessee public schools and placed in alternative school programs.

A Tennessee student who is expelled from school is forbidden to attend and is removed from the school rolls during the period of expulsion. Expulsions are usually long term; for a semester or an entire school year. A student who is suspended from school is forbidden to attend during the period of suspension. During the suspension period, which is usually short term, the student remains on the school rolls.

This year, for the first time, Tennessee is calculating expulsion and suspension rates by race and sex. Rates are not considered statistically significant if the number of students in the category is 100 or less. These categories are marked “ns”.

Tennessee Public School Systems
Tennessee Comprehensive Assessment Program
Grades Three through Eight

A comprehensive set of nationally normed achievement tests is administered annually to Tennessee students in grades 3 through 8. These tests provide norm-referenced data for national comparisons as well as criterion-referenced information for use in determining whether students have mastered specific instructional objectives. These tests also provide the data necessary for the Tennessee Value Added Assessment System. [For more information on that topic, please see the section with that title.] Student performance as shown in these tables and in the chart below is expressed in terms of national percentiles. The 1999 national percentiles are based upon comparisons to the latest national performance obtainable.

1999 National Percentiles

Grade	3	4	5	6	7	8
Reading	55	53	55	48	51	58
Language	62	59	54	58	58	59
Math	58	57	56	52	54	57
Science	50	50	51	55	53	56
Social Studies	51	49	49	51	49	53

Five achievement levels have been established based on what students should know and be able to do as they progress through each grade. The levels are: *Step 1, Progressing, Nearing Proficiency, Proficient, and Advanced*. The two benchmark grades for attaining *Proficient* or *Advanced* are grades five and eight. The standards for attaining these levels are very high. As shown in the following table, Tennessee students equaled or exceeded the national percentage of students attaining *Proficient* or *Advanced* levels of performance in three of the five subject areas tested in grade 5. Tennessee students exceeded the national percentage of students attaining *Proficient* or *Advanced* levels of performance in all of the subject areas tested in grade 8.

Percentage of Students Attaining *Proficient* or *Advanced*

Tennessee Public School Systems
Tennessee Writing Assessment

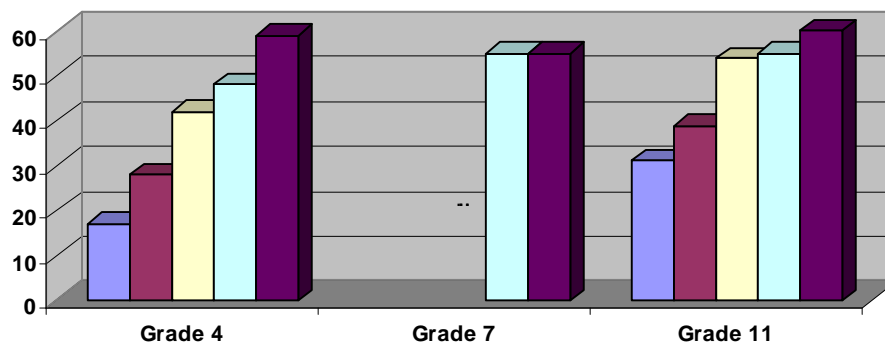

All Tennessee fourth, seventh and eleventh grade students are required to take a writing assessment. This requirement began with the 1994-95 school year and is based on a State Board of Education regulation designed to ensure that all Tennessee students can communicate well in writing. The percentage of students performing at the competent level or better has increased steadily statewide and for most school systems.

The Tennessee Writing Assessment is a performance-based test in which students are required to write an essay on a specified topic within a certain amount of time. Fourth graders are asked to write a story, seventh graders are asked to write an essay explaining something, and eleventh graders are asked to write a persuasive essay. The following chart shows the six-point scale on which scores are based:

Score	Performance	Score	Performance
6	Outstanding	3	Limited
5	Strong	2	Flawed
4	Competent	1	Deficient

The fifth annual Writing Assessment was administered to 66,789 fourth grade students, 62,520 seventh grade students, and 46,871 eleventh grade students in Tennessee public schools in February 1999. The scores were improved in grades four and eleven. This was the second year for administration to seventh grade students. Between 1995 and 1999, the percentage of students who scored in the “competent” to “outstanding” range increased from 16.3% to 59.2% in grade four and from 30.3% to 59.5% in grade eleven. The seventh grade percentage for this second year remained at 52%. The following chart compares student performance for each year of test administration:

**Comparison of 1995 thru 1999 Percent of Students
Scoring Competent or Better**

The table presented on the following pages shows the percent of students performing at or above the competent level in each grade level tested.

Tennessee Public School Systems
Tennessee Value-Added Assessment System

The Tennessee Value-Added Assessment System (TVAAS) is designed to measure students' academic gain over time by comparing each individual student's past performance on tests from the Tennessee Comprehensive Assessment Program (TCAP) to their performance in a given year. The value-added system uses test results from the assessments taken by Tennessee students each spring in grades three through eight. The scale for each test in the TCAP set of tests increases with each grade level so that a difference can be calculated to show how much a student learns each year. For example, the difference between a student's score on the third-grade math test and his or her score on the fourth-grade math test indicates how much the student learned in the fourth grade. The value-added reports complement the TCAP reports and provide additional information on students' academic success.

This system assumes that all students can improve academically each year at the same rate as all other students. Imagine a child climbing a ladder. Each successive rung represents higher academic achievement. Regardless of which rung the student stands on at the end of one year, his or her goal should be to climb at least as many rungs the next year as the average student climbs. The number of rungs the average student will climb is based on a national sample of students that was carefully selected to represent all students. The actual performance of the national sample of students is called the national norm; the difference in scores between students in different grade levels is called the national norm gain. Tennessee students' actual performance is compared to that standard.

**Change in the Percent of Three-Year Average Academic
Cumulative Gain for 1993 through 1999**

Three-year average gains are used to determine whether systems are meeting the requirement of making 100% percent of the national norm groups' gains in the academic areas. The performance of Tennessee students has improved since 1993, the first year for which three-year average cumulative gains were provided. The results for students in each Tennessee school system are presented in the table on the following pages.

Tennessee Public School Systems Tennessee Competency Test

Tennessee has administered a “high stakes” graduation test in math and language arts since 1982. To receive a regular high school diploma, students must take and pass both parts. The standards were raised in 1995 and the name changed from “Proficiency” to “Competency.” Students are first offered the opportunity to pass the test in the ninth grade and may retake the test each year until they graduate. The tables presented on the following pages show the percent of all ninth grade students who passed one or both parts of the test during their first year.

Tennessee students performed well on this test last year; 65% of those taking the test for the first time passed both parts; 78% passed the language arts section and 71% passed the math section. The performance of Tennessee students has improved since 1995, when comparable figures were 61% for both parts, 78% for language and 66% for math. The figures presented by system in the tables that follow do not include students who receive more than four hours of special education services per week. When special education students are included in the data, the pass rates for last year become 61% for both parts of the test, 67% for math and 74% for language arts. As the chart below illustrates, both groups of students performed similarly on the test in 1998-99 as in 1997-98.

TCAP Competency Test Statewide Results 1995-99

Percentage of
Students Meeting
the Requirement

"With" includes special education students.

Even though statewide students' scores are improving on this assessment, the change for this period varies among the school systems. About 75% of the systems demonstrated significant improvement between 1995 and 1999 in the percentage of first time freshmen passing the math test, and nearly 55% of the systems showed a significant improvement in the percentage of first time freshmen passing the language arts test. The table on the following pages shows the scores for each year at the system level between 1995 and 1999.

Tennessee School Systems
High School Subject Matter Tests—Math

The 1998-99 fall and spring assessments of high school mathematics revealed an overall upward trend in student performance in all subjects except Algebra II over the four-year period during which these tests have been given. Scores for all subjects improved over the previous year, with Mathematics for Tech I showing the most dramatic improvement.

Average Percent Correct

Subject	1995-96	1996-97	1997-98	1998-99
Pre-Algebra	49%	59%	55%	57%
Algebra I	53%	56%	57%	62%
Algebra II	51%	45%	48%	50%
Unified Geometry	55%	56%	57%	58%
Mathematics for Tech I	56%	59%	60%	66%

Performance on these tests varied widely among school systems. The following chart illustrates the differences in performance between the ten highest-scoring systems and the ten lowest-scoring systems.

Performance on the tests cannot be compared to other states or to the nation as a whole because they were customized for Tennessee and were not nationally normed. Nevertheless, test reports provide diagnostic data to help identify strong performance and areas that need improvement. Data from these assessments were also used to determine the academic “value-added” for schools and school systems by comparing actual scores to scores predicted based on each student’s performance on previous TCAP achievement tests. The tables on the following pages show the average predicted and actual scores for students in each school system along with an indicator of whether the value added, or gain, in each system was above, below or not significantly different from the gain statewide. The information presented is based on three-year averages for each year.

Tennessee Public School Systems
Scholastic Aptitude Test–SAT I

The SAT I Reasoning test is one of three assessments approved by the State Board of Education to fulfill the requirement in state law that all students take an exit exam to receive a full high school diploma. This test is designed to measure many of the skills that are important to students' success in college. Because the subject matter of high school courses and grading standards vary widely among high schools, the test has been developed to provide a common standard against which students can be compared.

Only 7,286, or 13%, of Tennessee's 1999 college-bound seniors took the SAT I. Nationwide, 43% of the 1999 college-bound graduates took this test. Two factors make it difficult to compare overall scores in Tennessee to national scores: the relatively small number of students taking the test in Tennessee and the increase in the number of students taking the test as a result of the new exit exam requirement. A better comparison is Tennessee's top 10% versus the nation's top 10%. In this comparison, Tennessee students out performed their national counterparts by 30 points on the verbal section and by 12 points in mathematics.

Eight-year Trend for Scholastic Aptitude Test (SAT) Results

Year	Tennessee				Nation			
	Top 10 Percent		All Students		Top 10 Percent		All Students	
	Verbal	Math	Verbal	Math	Verbal	Math	Verbal	Math
1992	613	600	559	548	592	595	500	501
1993	615	604	561	549	593	596	500	503
1994	613	608	562	553	592	596	499	504
1995	628	619	571	560	598	600	504	506
1996	622	621	563	552	591	606	505	508
1997	619	617	564	556	589	606	505	511
1998	621	621	564	557	590	607	505	512
1999	620	619	559	553	590	607	505	511

Note: SAT results are reported on a 200-800 point scale

The table on the following pages presents system average SAT scores. Some systems had very few students take the SAT assessment. Consequently, the data may not represent a valid estimation of true system achievement and should not be interpreted as such.

** Indicates four or fewer students taking the exam.

Tennessee Public School Systems
American College Test–ACT

The ACT is one of three tests approved by the State Board of Education to fulfill the requirement in state law that all students take an exit exam to receive a full high school diploma. The total number of Tennessee graduates taking the ACT rose 32% during the first four years of this new requirement: from 32,628 in 1995 to 42,918 in 1999. Included among those tested were 15,505 who had not completed a college preparatory course of study. Even with these dramatic increases in the number and percentage of students tested, Tennessee's students were able to narrow the gap between the state and national composite scores in 1999. As shown in the table below Tennessee graduates improved performance in English, Reading, and the Composite scores. The table compares Tennessee's performance to the 13 states served by the Southern Association of Colleges and Schools (SACS) and to the nation as a whole.

ACT Averages for All Students

Area	English			Math			Reading			Science			Composite		
	92	98	99	92	98	99	92	98	99	92	98	99	92	98	99
Tennessee	20.2	19.6	19.8	19.3	19.1	19.1	20.8	20.2	20.4	19.9	19.8	19.8	20.2	19.8	19.9
SACS	19.8	19.6	19.7	19.3	19.6	19.5	20.2	20.4	20.3	19.8	20.0	19.9	19.9	20.0	20.0
Nation	20.2	20.4	20.5	20.0	20.8	20.7	21.1	21.4	21.4	20.7	21.1	21.0	20.6	21.0	21.0

With more Tennessee students moving into the category of those taking a full load of core academic courses, scores for that group unexpectedly remained at or above average scores for the southern states in English and Reading during 1999.

ACT Averages for Students Taking Core or More Courses

Area	English		Math		Reading		Science		Composite	
	1998	1999	1998	1999	1998	1999	1998	1999	1998	1999
Tennessee	20.8	21.1	20.1	20.0	21.4	21.4	20.7	20.6	20.9	20.9
SACS	20.7	20.8	20.6	20.5	21.4	21.3	20.8	20.7	21.0	21.0
Nation	21.5	21.6	22.0	21.8	22.4	22.4	22.0	21.9	22.1	22.0

The gap in composite scores for Tennessee males and females held steady in 1999 at two-tenths of a point which equals the gap for the nation as a whole.

	English	Math	Reading	Science Reasoning	Composite
Females	20.2	18.6	20.5	19.4	19.8
Males	19.4	19.7	20.2	20.2	20.0

Tennessee Public School Systems

The ACT *Work Keys* assessment is one of three tests approved by the State Board of Education to fulfill the requirement in state law that all students take an exit exam to receive a full high school diploma. Over 12,500 students took this test during the 1998-99 school year. The assessment includes three components related to success in the work place. The components tested in 1998-99 were:

- *Reading for Information*, which measures skill in reading and understanding work-related instructions and policies.
- *Applied Mathematics*, which measures skill in applying mathematical reasoning to work-related problems.
- *Locating Information*, which measures skill in using information presented in workplace graphics such as diagrams, floor plans, tables, graphs, charts, and instrument gauges. At the highest level examinees are asked to make decisions and draw conclusions based on information contained in one or more graphics.

There are no national norms for these tests, and different scales are used for each component to discourage combining scores from different tests into a single composite score. These tests are designed to provide a profile of skills that can be matched to profiles of skills necessary for particular jobs. As shown in the following chart, statewide scores declined from 1997-98 in *Reading for Information* and *Applied Mathematics*. This was the first year for statewide administration of *Locating Information*.

Statewide Average Scores

Component	Scale	1992-93	1997-98	1998-99
Reading for Information	(3-7)	4.6	4.1	3.9
Applied Mathematics	(3-7)	4.1	3.8	3.7
Locating Information	(3-6)	n/a	n/a	3.3

The performance of Tennessee students on the *Work Keys* assessment in each school system is provided in the table on the following pages.

* First year for statewide administration.

Tennessee Public School Systems
Progress in Reading and Mathematics Grade 2

Beginning with the 1998-99 school year, all Tennessee public school systems were required to report the number of second graders performing at or above grade level in reading and mathematics. Systems used one or more of the following instruments to collect the data:

- Cumulative reviews that accompany the reading and mathematics text programs adopted for the system.
- Grade 3 placement tests that accompany the reading and mathematics text programs adopted for the system.
- Systemwide instruments aligned with the local instructional plan.
- Grade 2 *Terra Nova* data.

The information in the following table shows the percentages of second grade students that are at or above grade level in reading and mathematics as reported by each system.

Tennessee Public School Systems
Total Schools and Grades Served

The total number of Tennessee public schools operated in 1998-99 was 1,589. The number of schools has increased by only 4% since 1991-92 when 1,532 were operated. The following table shows slight variations in the distribution of schools by grades served between 1991-92 and 1998-99.

Grade	1991-92		1998-99	
	Number	Percent	Number	Percent
K-5	--	--	1	1%
K-6	5	4%	2	1%
K-8	9	6%	11	8%
K-9	4	3%	3	2%
K-12	119	86%	120	87%
9-12	1	1%	1	1%

Note: Data for Hamilton County and Chattanooga City are combined for 1991-92.

Tennessee Public School Systems
Schools Accredited by the Southern Association of Colleges and Schools

Accreditation by the Southern Association of Colleges and Schools (SACS) is voluntary and offers high standards for all public and nonpublic schools who aspire to join. Since the passage of the Education Improvement Act (EIA) of 1992, the number of Tennessee schools accredited by SACS Commission for Elementary and Middle Schools has increased 59%. There is a slight decrease in the percentage of elementary and middle schools accredited by the Elementary and Middle Schools Commission from 1997-98 (60%) to 1998-99 (59%) due to an increase in the number of new elementary and middle schools in Tennessee. The number accredited by the SACS Commission for Secondary and Middle Schools has increased to 86%. The increase in the number of accredited schools is partly the result of consolidating Tennessee's process for school improvement planning with the SACS accreditation process. One process, one plan is the focus for improvement. The following chart shows the increase in the number and percent of schools accredited since 1991-92.

SACS Commission

	1991-92	Percent of Total	1998-99	Percent of Total
Elementary and Middle	341	40%	703	59%
Secondary and Middle	260	49%	385	86%

The purpose of SACS is to improve schools through implementing regionally developed and approved performance standards. Founded in 1895, the association is voluntary, non-profit and non-governmental. Membership is open to public and non-public institutions in 11 southern states and Latin America. Currently there are more than 12,000 members enrolling nearly 11 million students. In Tennessee, accreditation is a process of helping institutions improve through a systematic program of evaluation and the application of educational standards or criteria. Accreditation means not only that minimum standards are met, but also that the school community is committed to raising the quality of its program.

Regional accreditation is a comprehensive process covering the total school, not just certain programs. Member schools must develop a strategic plan that focuses on school wide improvement. A team of teachers, principals, other administrators, and higher education representatives evaluates each school. Accreditation is not a permanent status. Continuing membership in the Southern Association depends on continuing improvement demonstrated through a regular cycle of annual reports, interim reviews, and periodic full re-evaluations with a self-study and visiting team every five years.

Tennessee Public School Systems
Class-Size Requirements

The Tennessee General Assembly, believing that smaller classes increase students' chances of academic success, included class-size standards in the Education Improvement Act (EIA) of 1992 that will require lower class sizes for all grades by school year 2001-02. Beginning in that year, Tennessee school systems will no longer be able to obtain waivers for schools that do not meet these requirements. The standards are presented in the following chart:

Grade Level	Average Class Size	Maximum Class Size
K-3	20	25
4-6	25	30
7-12	30	35
Vocational Education	20	25

Overall, only 1.5% of all classes to which the EIA class-size requirements apply exceeded the maximum class-size limits in 1998-99, compared with nearly 4% in 1991-92. Those figures vary widely among school systems. Some school systems have no over-sized classes, while three have as many as 6%. The number of Tennessee school systems with all classes at or below the class-size maximums has more than doubled (20 in 1991-92 compared with 42 in 1998-99).

Tennessee System Progress Through 1998-99

	Maximum	Average	Both
Meeting Standards	42	31	19
Improving	74	81	77(a)
All Others	22	26	42(b)

- (a) Met one standard, improving in other = 23
Improving in both standards = 54
- (b) Met one standard, no improvement in other = 12
Improved in one standard, no improvement in other = 24
No improvement = 6

In 1992-93, 43% of all Tennessee schools were at or below the EIA class-size averages with only nine systems (6%) having all schools in compliance with class-size average standards. By 1998-99, approximately 62% of all schools were at or below the EIA class-size averages with 31 systems (22%) having all schools in compliance with class-size average standards. In 1998-99, 19 systems were in compliance with both class-size maximums and class-size averages.

Tennessee Public School Systems
Personnel by Category

Personnel are reported by assignment by the school systems to the Department of Education. Upon receipt of data from the schools, the Department groups personnel into six basic categories: administrators, teachers, student support personnel (guidance counselors and librarians, for example), teaching assistants, staff support personnel and other personnel, which includes everything from accountants to bus drivers.

A wide range of instructional and support personnel is required to effectively operate a school system. School systems' choices will vary based on local needs and local educational strategies. For example, the category "other personnel" may vary in size because some systems contract services such as maintenance and bus transportation while other systems hire personnel to provide those services. The only requirement imposed by the state is that certain class sizes be maintained in the regular academic and vocational education programs and that professional instructional personnel are qualified for their positions. [For more information about class sizes and personnel qualifications, see the sections on Class-Size Requirements and Employment Standards Waivers and Permits.]

The information in the following table includes percentages of employees for each of the six categories listed above. Each category is shown as a percentage of the total personnel employed by the system. For instance, statewide 51.2 % of total personnel were teachers and only 3.5% were administrators during 1998-99.

Tennessee Public School Systems
Employment Standards Waivers and Permits

Every teacher in Tennessee is required to hold a valid Tennessee Teaching License. The license contains endorsements for the specific areas in which the person is prepared to teach. If a local Tennessee school system wishes to employ a person who does not hold a valid license or has a valid license but not the required endorsements, the local school system must secure a permit or an employment standards waiver for the individual. These are issued under the following conditions:

- A permit is issued when a person the system or school wants to employ does not hold a Tennessee Teaching License. This person may be employed only until a licensed teacher can be secured for the position.
- A waiver of employment standards is required when both (a) a person qualified for the assignment is not available and (b) the applicant has a license, but does not have the endorsement required to teach the anticipated assignment. Employment standards waivers may be granted based on an Apprentice License or a Professional License.

As shown in the table below, the number of waivers has increased since 1991-92. However, between 1991-92 and 1998-99, and between 1997-98 and 1998-99, an equal number of school systems (74) decreased or had no change in the number of waivers requested for school personnel.

Number of Employment Standards Waivers and Permits

	1991-92	1997-98	1998-99	Trends	
				Seven-year	One-year
Waivers	409	424	681	9.9%	37.7%
Permit	112	701	691	517.0%	(1.4%)

The number of permits has increased substantially since 1991-92 and now stands at 579 more than in 1991-92. Even with the significant statewide increase in permits between 1991-92 and 1998-99, 75 school systems decreased or had no change in the number of permits requested for school personnel, while during the 1997-98 and 1998-99 school years, 107 school systems decreased or had no change in their requests for permits.

[For more information about class size, refer to the section entitled Class-Size Requirements. For information about the growth in the number of teachers, see the section entitled School System Personnel by Category.]

System*

Tennessee Public School Systems
Expenditures by Public School Systems

General expenditure patterns for public school systems in Tennessee can be determined by looking at their annual financial reports. Patterns differ from system to system because each school system sets priorities based on their local needs, as well as statutory and regulatory requirements, and allocates funds to address those needs. Patterns derived from these reports may also differ—even in regard to services that all systems must provide—because of different arrangements they may have made for providing those services. Two significant examples that may cause some systems to appear to have lower expenditures are transportation and food service.

In the case of transportation, several Tennessee school systems contract with other school systems to provide these services for their students. This situation is apparent in the Transportation Expenditures table. In the case of food service, some school systems maintain accounting records for school cafeterias at individual schools, and the funds are accounted for in school cafeteria reports rather than in the school system's financial reports. However, patterns for food service expenditures for all systems, regardless of their accounting policies, are presented in the table Food Service Program—Cost per Meal.

Total expenditures in the tables on the following pages are presented in five general categories. They are as follows: operating expenditures (for the day-to-day operation of schools), capital outlay and debt service (for the construction and renovation of school buildings and for the payment of debt issued for school purposes), state administration (state expenditures on behalf of school systems), commodities (federal provisions for local school food service programs), and other expenditures (which includes activities such as community service).

While all Tennessee school systems have increased operating expenditures since 1991-92, not all systems have increased at the same rate. In general, school systems with the smallest local tax bases have received relatively larger amounts of new state funds through the Basic Education Program (BEP) formula because of the new method of equalizing revenues. Operating expenditures are also increasing more rapidly in systems with higher enrollment growth. Operating expenditures increased more than 50% between 1991-92 and 1998-99 in 117 school systems, including 38 with increases greater than 75%. To a large degree, these increases can be attributed to increases in state funding through the BEP formula. The smallest increase by any school system since 1991-92 was 23%.

[For a breakdown of Operating Expenditures by Major Function, refer to the section with that title.]

Tennessee Public School Systems

Tennessee Public School Systems
Expenditures by Function

The tables on the following pages show expenditures for the following major functions: regular instruction, special education, vocational education, system administration, operation and maintenance of school facilities, state-level expenditures for K-12 education, and the value of commodities provided for food service programs by the U. S. Department of Agriculture. Total expenditures and expenditures per Tennessee student are presented for each of these functions. In addition, total transportation costs and cost per student transported are presented in a separate table. Transportation costs vary among Tennessee school systems because some school systems contract with other systems to provide these services for their students and some systems do not provide transportation services. Refer to the notes at the end of the table to identify these systems. Finally, the average cost per meal served for each school system is presented in a separate table. Tennessee systems that provide breakfast as well as lunch programs are identified in the table because their average costs tend to be lower.

As shown in the following tables, the total amount spent for regular instruction increased from \$1.460 billion in 1991-92 to \$2.499 billion in 1998-99. This \$1.039 billion increase evidences a strong commitment statewide to putting new state dollars into the classroom, where they will have the greatest impact on student learning. Expenditures per student for regular instruction increased from \$1,764 in 1991-92 to \$2,801 in 1998-99. This 58.8% increase in expenditures per student is seven times as great as the percent increase in the number of students for the same period. Instructional improvements include new teachers hired to reduce class sizes, additional textbooks, materials and supplies and instructional equipment. These improvements are possible as a direct result of the Basic Education Program (BEP) formula providing the funds necessary to have a high quality education for the students of Tennessee.

[For a summary of all expenditures, see the section entitled Expenditures by Public School Systems.]

Tennessee Public School Systems
Transportation Expenditures

* Transportation Notes:

Anderson County	(Provides transportation for South Clinton School located in Clinton City.)
Clinton City	(Anderson County provides transportation for South Clinton School.)
Oak Ridge	(Prior to 1996-97, Oak Ridge had pay services only.)
Alcoa City	(Provides transportation for Special Education and Pay Services.)
Carroll County	(Provides transportation for Hollow Rock-Bruceton SSD, Huntingdon SSD, McKenzie SSD, South Carroll SSD, and West Carroll SSD.)
Hollow Rock-Bruceton SSD	(Transportation provided by Carroll County.)
Huntingdon SSD	(Transportation provided by Carroll County.)
McKenzie SSD	(Transportation provided by Carroll County.)
South Carroll Co SSD	(Transportation provided by Carroll County.)
West Carroll Co SSD	(Transportation provided by Carroll County.)
Newport City	(Provides transportation for Special Education only.)
Crockett County	(Provides transportation for Alamo City and Bells City.)
Alamo City	(Transportation provided by Crockett County.)
Bells City	(Transportation provided by Crockett County.)
Dyer County	(Provides transportation for Dyersburg City.)
Dyersburg City	(Beginning in 1996-97, all transportation provided by Dyer County.)
Hawkins County	(Provides transportation for Rogersville City.)
Rogersville City	(Transportation provided by Hawkins County.)
Lexington City	(No transportation provided.)
Richard City SSD	(No Transportation provided.)
Sweetwater City	(System transports students and so does Monroe County.)
Union City	(No Transportation provided.)
Dayton City	(No transportation provided.)
Roane County	(Provides transportation for Harriman City.)
Harriman City	(Transportation provided by Roane County. Transports Special Education students.)

* School system provided lunch only in 1991-92.

Tennessee Public School Systems
Expenditures per Student

Statewide expenditures per student have increased considerably since 1991-92, primarily because of the large influx of state funds through the Basic Education Program (BEP) formula. The following chart illustrates the change in the expenditures per student from 1991-92 to 1998-99. The largest percent increases occurred in those Tennessee school systems with the lowest expenditures because a greater proportion of new state BEP funds went to those systems with the least ability to fund education by raising revenue locally. [For more information about ability to raise revenue locally, please see the section entitled County-Area Education Fiscal Capacity.]

	1991-92	1998-99	Increase	Percent Increase
Lowest	\$2,034	\$3,376	\$1,342	66.0%
Average	\$2,972	\$4,667	\$1,694	57.0%
Highest	\$4,751	\$6,823	\$2,072	43.6%

Number of Tennessee School Systems by Range of Expenditures per Student

	1991-92	1998-99
Less than \$3,000	108	0
\$3,000 to \$4,000	24	33
\$4,000 to \$5,000	5	81
\$5,000 to \$6,000	0	20
More than \$6,000	0	4

The calculation of expenditures per student is intended to provide a basis for comparison among school systems of different sizes. Data used for this calculation include expenditures from school systems' annual financial reports, expenditures by the state on behalf of school systems and the value of commodities provided by the U. S. Department of Agriculture for school food service programs. Four categories of operating expenditures included in the school systems' financial reports are excluded from this calculation. Student body and adult education expenditures are excluded because they are not activities within the K-12 education program. Transportation and food service categories are excluded in order to make the presentation of expenditures per student more comparable from system to system. Transportation expenditures are excluded because some school systems do not provide these services, while certain other systems provide transportation services for neighboring school systems. [For notes identifying these systems, refer to the table entitled Transportation Expenditures.] Expenditures for food service are excluded because some school systems account for these services at the central office, and therefore include them in their annual financial reports, while other systems account for the same services at individual schools and include them in their school activity fund reports. [For information on the food service programs for all school systems, refer to the table entitled Food Service Program—Cost per Meal.]

Tennessee Public School Systems
**Expenditures for Principal and Interest on Bonded Debt
Paid by Other Agencies**

The table on the following pages presents the amount of principal and interest paid on bonds issued for the construction, renovation and equipping of K-12 schools by agencies other than school systems themselves. In Tennessee county and city systems, these payments are generally made from the debt service funds maintained by county executives and city managers and reported by school systems in their annual financial reports. Unlike city and county school systems, special school districts, which are created by the legislature, pay their own bonded debt. Therefore, the only figures included in this table for special school districts are amounts paid by two cities for schools built before the special school districts were established.

With the implementation of the Education Improvement Act (EIA) of 1992, which requires smaller classes, more classrooms are being built to provide space for additional teachers. This situation is reflected in the increase in bonded debt payments by other agencies for many of the school systems. Not shown in this table are amounts paid by school systems themselves. For these amounts, see the table entitled Expenditures for Capital Outlay and Debt Service elsewhere in this publication.

Several systems show declines in the amount of bonded debt paid by other agencies for the years included in the table on the following pages. These declines represent the retirement of debt issued prior to the enactment of the EIA, and in some cases the use by school systems of the new state dollars provided through the Basic Education Program (BEP) formula for the payment of new debt. Some of the large increases in bonded debt payments from one year to the next are the result of issuing new bonds to take advantage of lower interest rates and retiring the original bonds with the proceeds of the new, lower-interest bonds.

Tennessee Public School Systems
Average Salaries for Teachers

For the 1998-99 school year, average salaries for teachers ranged from \$29,182 to \$44,309, with a statewide average of \$35,490. The statewide average has increased 24% since 1991-92, up from \$28,621. Average salaries in most public school systems range between \$30,000 and \$35,000; however, while 45 systems had average salaries of less than \$25,000 in 1991-92, no system has averaged less than that amount for the last two years. And while only two systems had average salaries of more than \$35,000 in 1991-92; now 32 systems have average salaries in excess of \$35,000.

Number of School Systems by Range in Average Teachers' Salaries

	1991-92	Percent	1998-99	Percent
\$20-25,000	45	32.6%	0	0%
\$25-30,000	71	51.5%	14	10.1%
\$30-35,000	20	14.5%	92	66.7%
\$35-40,000	2	1.4%	27	19.6%
\$40,000+	0	0%	5	3.6%

In 1995, the Tennessee General Assembly passed legislation to improve equity in teachers' salaries among school systems. This program was fully funded in 1996-97 and appears to have improved equity in salaries. Generally, the largest percentage increases in salaries have occurred primarily in Tennessee school systems that had the lowest salaries in 1991-92. For 1998-99, the percentage difference between the lowest and the highest averages is smaller than it was in 1991-92. At the beginning of this period, the highest salary was 68% more than the lowest salary. In 1998-99, the difference was 52%.

Tennessee Public School Systems
Public School Funding by Source

Tennessee public school systems receive funding from three primary sources: local, state and federal. Since 1991-92, all state funding for education has increased \$1.247 billion (107%), while total local funding has increased 53%, and federal funding has increased only 35%. State funds have become a larger portion of the total for most systems as a result of implementation of the Basic Education Program (BEP) formula, which was fully funded for the first time in 1997-98. Since the phase-in of the new formula began in 1992-93, the mix of state, local and federal funds has changed significantly. The following chart shows the change in the mix between 1991-92 and 1998-99.

	1991-92		1998-99	
(in thousands)				
Local	\$1,345,400	47.5%	\$2,052,300	41.9%
State	\$1,160,600	41%	\$2,407,400	49.2%
Federal	\$ 324,100	11.5%	\$438,000	8.9%

The BEP formula is the primary source of state funds for local school systems. Additional state funds are allocated for the Career Ladder and Extended Contract programs and for driver education, school food service and vocational programs. Local funds for education are raised from two primary sources: property taxes and the local option sales tax. Additional sources of local revenue include wheel taxes, bank excise taxes and business taxes.

All federal funds are earmarked for specific purposes, such as vocational education and the education of disadvantaged, at-risk and handicapped students. Federal funds are also provided to teach English as a second language, to subsidize school breakfast and lunch programs, and to offset tax losses as a result of large tracts of tax-exempt federal land in an area. Although the amount of federal revenues received by school systems has increased by \$114 million since 1991-92, federal funds now comprise a smaller percentage of all school system funding because federal funding has not grown as rapidly as state and local funding.

Tennessee Public School Systems
State and Local Revenue per Student

A good rule of thumb for funding equity is whether a system's combined state and local revenue per student is within ten percentage points of the statewide revenue per student. Based on that rule of thumb, Tennessee's Basic Education Program (BEP) formula has dramatically improved equity in funding. As shown in the following chart, the number of Tennessee systems within the "equity range" has grown from 33 (24%) in 1991-92 to 71 (52%) in 1998-99. The number of systems with less than 80% of the statewide revenue per student has fallen from 43 (31%) to 1 (.70%). That is enormous progress for the first seven years of funding through the BEP formula.

**Number of School Systems
 by Range in Percent of Statewide Revenue Per Student**

Percent Range	1991-92		1998-99	
Greater than 120%	10	7.0%	6	4.0%
Greater than 110%	17	12%	15	11%
90% to 110%	33	24%	71	52%
Less than 90%	87	64%	51	37%
Less than 80%	43	31%	1	.70%

This improvement in revenue equity is remarkable—even more so because it has not come at the expense of the systems at the top in revenue per student. Revenue per student has increased in every system in Tennessee. Since 1991-92 revenue per student has increased by more than 50% in 131 systems, with 82 of those increasing by more than 75%. The smallest increase was 34%, and the largest was 139%.

Increasing revenue per student at a time when the number of students in Tennessee public schools is growing has required even more substantial increases in state and local revenue. Between 1991-92 and 1998-99, the number of students in public schools increased 7.8% statewide and by more than 10% in 42 school systems. During this same period, total local revenue increased 46% statewide, and because of the state's commitment to fully fund the BEP formula by 1997-98 without forgoing reasonable salary increases for teachers, total state revenues for school systems increased 107%.

[For more information about the BEP formula, refer to the section entitled Basic Education Program (BEP) Formula. For more information about state, local and federal funding, refer to the section entitled Public School Funding by Source.]

Tennessee Public School Systems
Basic Education Program (BEP) Formula

The Tennessee Education Improvement Act (EIA) of 1992 established the Tennessee Basic Education Program (BEP) as the funding formula for kindergarten through grade twelve education in Tennessee. The components of the formula are grouped into two categories for determining the state and local share of formula funding in each school system: classroom and non-classroom. The EIA requires the state to pay 75% of the statewide cost of the classroom components and 50% of the statewide cost of the non-classroom components. [For more information on how responsibility for funding the cost of the BEP formula is divided between the state and local funding bodies, see the section entitled County-Area Fiscal Capacity.]

The split within the BEP formula between funding for classroom and non-classroom components has remained fairly constant— statewide and at the system level—with classroom components making up about 70% of the total. The split between classroom and non-classroom categories in actual local spending varies from that in the BEP formula for several reasons. For example, the BEP formula does not include the cost of local salary supplements. As a result, the actual percent of funds spent in the classroom category may be greater than the percentage of the BEP formula that falls into the classroom category.

The tables on the following pages show each Tennessee system's amount of classroom and non-classroom full funding (state and local combined); the system's classroom and non-classroom funding expressed as a percentage of total BEP formula funding (classroom and non-classroom, state and local); and the amount and percentage of total funds that each system actually spends in classroom and non-classroom areas.

Tennessee Public School Systems
County-Area Education Fiscal Capacity

Many factors influence a local government's ability to raise revenue for education. The fiscal capacity figures used to determine the required local share in the Basic Education Program (BEP) formula are provided by the Tennessee Advisory Commission on Intergovernmental Relations (TACIR). Fiscal capacity is calculated for each of the 95 Tennessee county areas and is based on the factors that best predict the amount of revenue local governments in Tennessee can be expected to raise for education.

TACIR updates the data in the model and produces a new measure of fiscal capacity each year based on an average of three-years of data. The data is shown in the following tables for the year in which it was used in the BEP formula. The factors found by TACIR to best predict actual local revenue for education include:

- tax base: total taxable sales and equalized assessed property values.
- ability to pay (tax payer equity): per capita income.
- resident tax burden: ratio of residential and farm property assessment to total property assessment.
- service responsibility: ratio of average daily membership of students in public schools to total population.

The percentages calculated with the TACIR formula are used to divide responsibility for the local share of the Basic Education Program (BEP) formula among the counties. The state pays 75% of the cost of the BEP classroom components and 50% of the non-classroom components. The TACIR fiscal capacity percentages are multiplied by the aggregate, statewide local share of the BEP funding (after the state-paid amount is deducted) to determine the amount for which each county area is responsible. This calculation produces the state and local percentage shares used to determine each public school system's funding. These figures are presented in the following tables.

For informational and analytical purposes, the TACIR fiscal capacity percentages are frequently compared to the actual percentage each county area raises of the total amount of local revenue raised for education in the state. These figures are expressed as ratios and are often referred to as effort ratios. A ratio of 1.0 indicates that a county area raised exactly the amount predicted by the TACIR formula. Ratios greater than one indicate greater than average revenue-raising effort; ratios less than one indicate less than average effort. No particular effort ratio is required. The ratios simply provide a thumbnail comparison for each Tennessee school system.

In 1998-99, the most recent year for which actual figures are available, effort ratios ranged from 0.6 to 1.7. Fifty-nine of the 95 county areas had ratios between 0.9 and 1.1, which means their effort was about average. Twenty county areas made greater-than-average effort. These county areas may have higher-than-average tax rates. Sixteen county areas made less-than-average effort, indicating that these counties may have lower-than-average tax rates.
